The last glacial cycle in marine sediments, Greenland ice, and Antarctic Ice

- δ¹⁸O (‰ vs. VPDB)
- MIS: Marine Isotope Stages
- LR04 stack of marine benthic foraminiferal records of Lisiecki & Raymo (2005)
- GISP2 Greenland ice record of Grootes and Stuiver (1997)
- GRIP Greenland ice record of Johnsen et al. (1997)
- GISP2 and Grip time scales adjusted to match NorthGRIP below
- NorthGRIP Greenland ice record with the chronologies of Svensson et al. (2008) for 10-60 ka and North Greenland Ice Core Project Members (2007) elsewhere
- Dansgaard-Oeschger Events or Greenland Interstadials
- Substage divisions of Johnsen et al. (1997)
- Termination II of Cheng et al. (2009)
- MIS 5e
- Previous interglacial
- Holocene – MIS 1
- Last Glacial Maximum
- Present interglacial

Years BP

Antarctic EPICA Dome record of Jouzel et al. (2007) using chronology of Veres et al. (2013) and Bazin et al. (2013)

Toba eruption ~74 ka
